

## Our Mission

*We support climate positive action in light of sustainability and circular economy through our global presence. We create measurable value for our clients by delivering tailored, high-quality, and high-impact solutions that enable sustainable business success. We monitor market trends and emerging needs to align our strategy with ongoing industry developments. We keep track of technological advancements and integrate relevant innovations into our process to stay competitive and provide market-ready tools and products that solve regulatory challenges. We see the development and implementation of Digital Product Passports as an integral part of our core business, enhancing transparency, compliance, and long-term value creation.*

## Our Verticals

### Circularity as a Strategy

*We help organizations move from linear compliance-driven sustainability to value-creating circular economy strategies.*

### Traceability, DPP & Lifecycle Intelligence

*We enable end-to-end product and supply-chain transparency through digital traceability, lifecycle data, and Digital Product Passport solutions.*

### Market Access Program (MAP)

*We support companies in entering, expanding, and scaling across international markets through structured market access, partnerships, and compliance readiness.*

### Knowledge, Compliance & Capability Building

*We provide insights into markets, technology, and regulatory frameworks. Our training service enhances capability building and skill development.*

## Products & Services Portfolio

### Circular strategy, Supply Chain Traceability & Field Data Analytics

We enable organizations to achieve their circular strategy and supply chain resilience goals. Identifying and bridging critical data gaps from raw materials to end-of-life recovery are achieved through a holistic approach of transparency and traceability. Implementing field data analytics gains actionable insights on supplier performance, sourcing conditions, ESG adherence, and product carbon footprint metrics. This service empowers companies to meet regulatory expectations, strengthen sustainability reporting, and build trust with customers and stakeholders by ensuring products are traceable, ethical, and environmentally responsible throughout their lifecycle.

## DPP Solution – Full Integration from Battery Origin to Multi-Sector Expansion

We offer end-to-end implementation of Digital Product Passport (DPP) solutions, beginning with complex products such as batteries and scaling toward additional product categories as regulations mature. Their integrated approach includes data architecture design, system integration, regulatory alignment, and lifecycle data management.

The service ensures that companies are ready for their next step fully unlocking business value through improved data visibility, streamlined compliance and readiness for the EU's evolving DPP mandates, and enhanced customer trust across multiple product streams.

## Market Access Program

Our Market Access Program supports companies in identifying new markets, partnerships, and growth opportunities around the world. Leveraging an extensive global network, we match businesses with the most suitable partners for expansion—whether distributors, technology collaborators, investment entities, or regulatory support organizations.

This program accelerates international entry, simplifies business development, and offers hands-on assistance in establishing operations, building strategic alliances, and securing a strong foothold in new regions.

## Policy Framework Support, Knowledge-Sharing Partnerships & Industry Webinars

We provide strategic guidance to organizations navigating evolving policy landscapes. The team works closely with government bodies, industry leaders, and regulatory stakeholders to shape practical, future-ready frameworks. Through structured knowledge-sharing partnerships, they help bridge the gap between policymakers and businesses, ensuring alignment on standards, compliance, sustainability, and innovation goals.

To amplify industry understanding, we host targeted webinars and workshops that equip companies with the insights needed to comply with new regulations, adopt best practices, and prepare for emerging trends across sectors such as energy, mobility, and advanced manufacturing.
